

# Griddle King

## Privacy Policy

Privacy Policy We use the third party [Stripe](#) as our payment gateway.

Stripe is Payment card industry (PCI) compliant. PCI compliance refers to the technical and operational standards that businesses follow to secure and protect credit card data provided by cardholders and transmitted through card processing transactions. PCI standards for compliance are developed and managed by the PCI Security Standards Council.

Your credit card is tokenised when saved to your Griddle King app and cannot be viewed by our team. The reason we require a credit card to be added to the account is to prevent fraud i.e. a single person creating multiple accounts to redeem welcome offers multiple times. We use LOKE Global as our app developers and this is not something we have capacity to change.
